

Dear FCC,

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

I been about to eat and talk with the family and do other work around house without being bother with telemarketers.

I was recieving 20 calls a day and now i get one or none. I even have to subscribe to get caller ID. So see who call but only out of area call. My house is no number and no answer.

The Indiana law is working do not change it. Period.

Thank you.
